# Our Farms

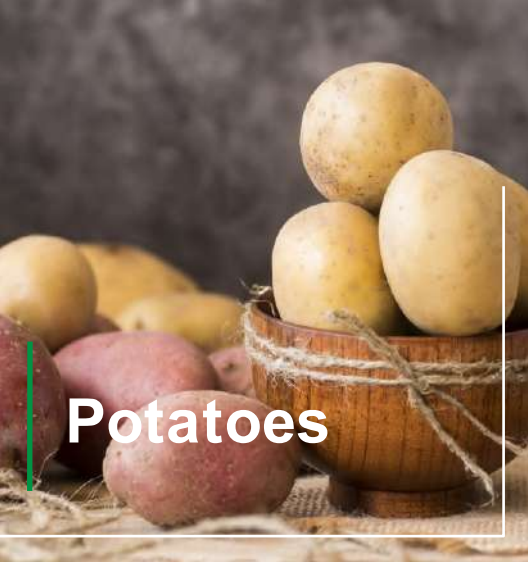

Teriak Farms were initially intended to serve as a family farm, operating with pest free terrain and using advances farming techniques in Egypt.

However throughout the past 30 years, Teriak family utilized their industrial experience to develop their farms to be one of the most technologically advanced farms in Egypt following the highest standards of quality control and automation.

In addition to the technological expansion of the farms, we also expanded in scale, from 2000 feddan to 10,000 feddan.

Our cultivation spreads across the Nubaria, Wadi El Natrun and El Wahat covering a wide range of production of fruits and vegetables.

**Our farms are GLOBAL G.A.P certified; we use the latest crop protection technology which incorporates biotechnology products, pesticides, herbicides, fertilizers, insecticides and fungicides in order to prevent any potential diseases or insects that may harm our impeccable quality.**

# Potatoes

## **Varieties**

*Spunta, Annabelle , Lady Rosetta  
& Mondial*

## **Season**

*Winter crop: From January till May.*
